Trombetta Acquires Custom Electronics Company

Acquisition Positions Trombetta to Compete in Systems Category

2-4-16, Milwaukee, WI -Trombetta has acquired Electronic Design Inc. (EDI) located in Sheboygan Falls, WI. EDI specializes in customized electronic control design products; many which utilize CAN-based communication.

EDI has a diverse offering of products with a strong engineering team that will allow Trombetta to expand its design capability and product offering to the electro-mechanical market. The EDI name will be folded into the Trombetta brand. Trombetta will keep the operations in Sheboygan Falls and plan to retain all employees.

“This is a great day for Trombetta and for Wisconsin,” said Paul Lindsay, Vice-President & General Manager of Trombetta. “We are able to expand our offerings with the acquisition of a great Wisconsin company that is just a few miles away. This is a great fit.”

About Trombetta:

Trombetta is a leading worldwide manufacturer of DC power switching and power management products for mobile applications. Our products include DC Contactors, Voltage Regulators, Industrial Solenoids, Switches and various Electronic Controls. Focused on meeting customer’s design requirements, we strive to develop innovative solutions that reduce cost while increasing performance.

Today Trombetta serves the PowerSport, Electric Vehicles, Ag & Construction, Heavy Truck, Marine, and Hydraulic Power Pack Markets.

Trombetta has multiple manufacturing sites located around the world. Three are located in the U.S. with international manufacturing facilities in Mexico and China.
